Foal Registration – *How to register your foal*

When registering a foal with the HHS, there are a few simple rules to follow to ensure the **prompt issuing** of your foals registration papers.

Step One - Ensure you fill out the Application for Foal Registration located on the HHS website under forms (see image above). Ensure all information is complete before sending it into the Society.

Step Two - Ensure you have a completed Service Certificate. This is issued from either the Stallion Owner or the Frozen Semen supplier. It is important that this form is completed with as much detail as possible. This form is then forwarded to the Vet or the AI technician who is going to inseminate your mare. They then fill in the details of the mare, including the date of insemination. This form must be returned to the Society with your application, which can also be done online.

Step Three - You must complete the Artificial Insemination form which is located on the HHS website. This is proof that the mare has been inseminated and that all remaining semen was either retained or destroyed. The vet who is inseminating your mare will provide this form, which is a compulsory document if you would like your foal registered.

Step Four - Ensure payment is made **PRIOR** to the Annual National Tour. Foals will not be classified if payment isn't made in advance. As per our breeding guidelines, Birth Certificates will not be issued if we don't have the Service Certificate and Artificial Insemination Certificate.

Notes

Mare owners need to be breeding members. If you aren't already a member of the HHS, then ensure you complete an application form and submit it at the same time as your mare classification or foal registration request. Foals are registered and mares are classified on the Annual National Tour, which is held in February each year. Be sure to check the HHS website for dates and venues.
